DESIGN CENTER: FINISHES AT YOUR FINGERTIPS

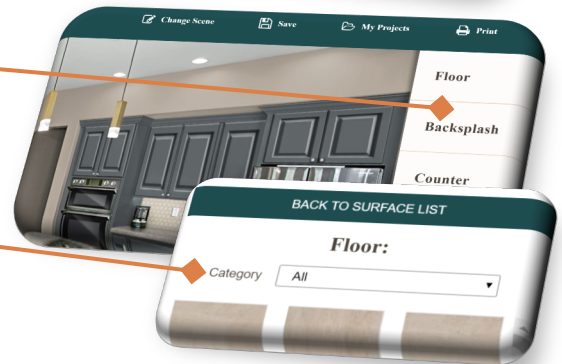

Here's how to get started. How long you play is up to you!

1. The right side of the screen invites you to Start By Selecting a Scene. Just click on your selection.

2. When the room scene appears, the right side now shows categories of finishes. Just mix and match finishes until you find the look you love.

Most finishes can be sorted by clicking the drop-down arrow for the Category menu.

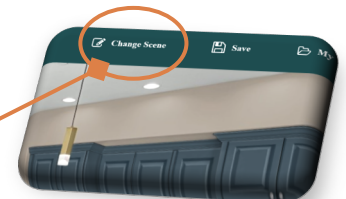

3. Keep your selections by clicking the SAVE icon at the top of the page. When the new window opens up, give your project a name, then click Save Project.

In the next window, add your email address and password to save your design to your My Projects folder. (If you haven't started a Projects folder yet, just click the register link to get started.) Remember that you're not only saving a picture, but all of the finishes you select will be part of your file as well. There's no limit to the number of designs you can save – just make sure to use different names to avoid confusion.

4. When you want to select finishes for a different space, click CHANGE SCENE at the top of the page.

5. You can print your selections by clicking the PRINT icon at the top of the page.
